

Leaf Structure

Directions:

1. Gather five different types of leaves. Depending on when this lesson is taught you can use photographs of leaves if no leaves are available.
2. Attach each leaf specimen to a sturdy sheet of paper.
3. Using the information from the presentation or the Internet, label each specimen.
4. Each leaf specimen should have the following clearly labeled:
 - A. Leaf parts
 - B. Leaf type
 - C. Leaf vein pattern
 - D. Leaf arrangement
5. Write a summary paragraph detailing your findings and citing all sources to turn in with your specimens.
