

Color Coordination

Directions:

1. Select a color scheme to use while planning floral arrangements for your ideal wedding flowers.
2. Using the *Floral Arrangement* list, choose all of the floral arrangements for your wedding. Be creative with your planning and keep these points in mind:
 - A. There is not a set budget for your floral arrangements.
 - B. You must not only choose your arrangements, but the flowers and foliage as well.
 - C. Keep in mind the size of your wedding, number of guests and reception size. You would not have a large reception with centerpieces on only half of the tables, so make sure you choose the correct number of arrangements for your needs.
3. After choosing a color scheme and flowers, create an online portfolio using a website such as <http://poster.4teachers.org/>.
4. In the portfolio, discuss and explain why your choices would create an eye appealing wedding. Be sure to mention how you not only incorporated your personal style, but the color scheme you chose and the season of your wedding into the floral arrangements.
