

Flower Crown

Basic Babies Breath Design

Supplies needed:
2-3 Chenille Stems
1 yard Floral Tape
3-5 stems of Babies Breath

Directions:

- Determine the size of your floral crown by attaching Chenille stems together at the ends, and testing the size on your own head.
- Once determined, cut off any extra and trim any exposed wire on the ends.
 - Cut 2-3" sections of flower stems from your babies breath.
- Attached each flower section, going in the same direction, using small sections of floral tape. Much like making a corsage.
 - Keep your design going all the way around the form.
- If desired, leave a section in the back for ribbon to hang sweetly down as far and as many as you like.
