

The Career for Me

Directions:

1. Select one career listed within the presentation which interests you.
2. Using the Internet, library or any other available resources, research and create a Microsoft® PowerPoint® presentation which details your findings.
3. Presentations must include the following:
 - Job characteristics
 - Alignment to personal interests
 - Aptitude for the selected career
 - Educational requirements
 - Technical skills needed
 - Special certifications needed, if applicable
 - Available positions in the region in which you would like to reside
 - Salary options
 - Potential lifetime earnings
 - Employee benefits typically offered
4. Once you find the educational requirements necessary for the selected profession, research and find at least three colleges/universities in which you can gain the required skills for the position.
5. Detail each college/university in your presentation by providing the following:
 - Name of school
 - School location
 - Degree plan required
 - Cost per semester hour
 - Any other information your instructor deems necessary
6. Make sure to include charts, tables or graphics to help illustrate each point within the presentation. Also, ensure the presentation is eye-appealing and easy to follow.
7. Create a citation sheet listing all sources used.
8. Share your presentation with the class.
