

# New Regulation

## Directions:

1. Research various impacts upon the environment in your local area.
2. Using this research, select one impact upon the environment and examine it further.
3. Once you have selected an environmental impact, prepare a proposal for new or additional regulation aimed at reducing the overall impact on the environment.
4. Craft your proposal as a presentation which could be made at a local city council meeting, using a poster board or some other form of visual similar to the example below.

New Fishing Regulation

Impact: Overfishing is reducing living resources in the ABC lake, causing an increase in algae.

Proposal: Reduce fishing through a voucher system allotting every citizen a specified number of fishing days per year.

Summary: Reducing overfishing will result in leaving more fish to eat the algae in the lake, improving the quality.

5. Be sure to include details about the impact, your proposal to reduce the impact and a summary of the issue with details about how your new regulation will improve the environment.
6. Cite all sources used
7. Present to the class.
